User Flow ⓘ

All screens ⌵ ⓘ

100% ⌵ ⌵

Flow diagram showing session paths between screens. The flow starts at `__root` (94%), goes to `__root/(unprotected)/...` (7%), then to `__root/index` (10%), `__root/onboarding` (52%), `__root/(unprotected)/...` (18%), and finally `__root/+not-found` (25%).

Percentages show the share of sessions that reached each screen; bands leaving a screen that add up to under 100% mean the rest dropped off there. Click a screen to focus the flow on it; ⌵/Ctrl-scroll or the + / - buttons to zoom.
